

PAPER PLATE DINOSAURS

VISIT US AT PAGE.TURNER.ADVENTURES.COM

DIRECTIONS:

Today we're making our own dinosaurs!

You can either look up a real dinosaur from millions of years ago you want to create, or come up with a super dinosaur. on your own Your only limit is your imagination and how many bits of plate you have to use.

1. Cut the plate in half.
2. Use half of the plate to create the body of your dinosaur.
3. Use the other half to create the body parts: head, tail, spikes, etc.
4. Use tape or glue to attach the body parts to the body.
5. Cut one toilet paper in half (with an adult's help) OR use two toilet paper tubes for a taller dinosaur.
6. Paint the toilet paper tubes and the dinosaur.
7. Allow to dry.
8. On one side of the toilet paper tube, cut two slits across from each other.
9. Do the same to the other tube.
10. Insert the bottom of the dinosaur into the slits, to create legs.
11. Glue on a googly eye (optional) and any other decorations.

MATERIALS:

- 1 Paper Plate (per dinosaur)
- 1-2 Toilet Paper Tube (per dinosaur)
- Craft Glue or Tape
- Paint
- Paint Brush
- Scissors
- Googly eyes (optional)

IF YOU WANT TO POST YOUR DINO, LET US KNOW WITH #STORYOLOGIST!
