

TUBE SNAKES

DIRECTIONS:

MATERIALS:

- 1 Cardboard Tube (a paper towel tube works best, but a toilet paper tube. You can also try a wrapping paper tube!)
- Paint (acrylic is best)
- Paint Brush
- 1 Cotton Swab
- 2 Googly Eyes
- Craft Glue
- Scissors
- Stickers (optional)

1. Cut the tube into a spiral shape by starting at the top and cutting on a diagonal. You will now have to pieces of curvy tube. You can use them like this or cut each piece in half to make skinnier snakes.

2. Paint the back and front of each strip. (You might need to give them a second coat). Decorate with stripes, dots, or other designs.

3. Allow to dry.

4. Paint on eyes or glue on googly eyes.

5. The paint might cause the spiral to straighten out. Don't worry!

6. Once the paint is dry, just wrap the cardboard strip around a paintbrush or a pencil until it curves again.

7. Add stickers or other decorations to your snake or leave as is!
